

## Learning Assessment

Name: \_\_\_\_\_ Date: \_\_\_\_\_

Please mark ✓ the following questions as either True or False, based on the materials given in this training.

|  | TRUE | FALSE |
|--|------|-------|
| 1. Most seizures last a few seconds to a few minutes.  |      |       |
| 2. Most people with epilepsy are also mentally retarded.   |      |       |
| 3. Complex partial seizures affect awareness.  |      |       |
| 4. I should call an ambulance if a student has a convulsive seizure lasting more than 5 minutes. |      |       |
| 5. I should administer a student's medication as soon as a seizure starts.                       |      |       |
| 6. I should track when a seizure starts and ends.  |      |       |
| 7. A student should not be restrained during a seizure.  |      |       |
| 8. I should never place an object in the student's mouth during a seizure.                       |      |       |
| 9. All epileptic seizures are convulsive.  |      |       |
| 10. Sometimes seizures look like blank stares or day dreaming.                                   |      |       |
| 11. Seizures always cause a student to lose consciousness.                                       |      |       |
| 12. One first aid measure during a convulsive seizure is to turn the student to one side.        |      |       |
| 13. Some types of seizures are contagious.   |      |       |
| 14. Some students may have warning signs just before a seizure starts.                           |      |       |
| 15. A student may be disoriented after a seizure and should not be left alone.                   |      |       |
